

\$RBNB

Whitepaper

·\$· INTRODUCTION

Today's cryptocurrency and digital asset activities are already a growing reality and will increasingly become an integral part of our daily lives. The world as we know it is in a state of constant and accelerated change. The ability to have borderless commerce and communication through the internet has already caused an immeasurable change in the way individuals handle their lives, finance and security. As this digital trend deepens, everyone, independent of origin or social status will be given the empowering opportunity to participate in decentralized digital economies powered by blockchain technology and cryptocurrencies. Decentralized economies powered by cryptocurrencies enable people and businesses to conduct trustless, anonymous and secure transactions across national borders. New opportunities for retail, entertainment, finance and essentially anything else that a person might want to spend fiat currency on, are already available in this digital economy today.

·\$· **WHAT IS \$RBNB?**

RBNB is the native token for the hybrid DeFi - NFT ecosystem. RBNB will be evenly distributed in accordance with activities done with the token. Our users can earn \$RBNB by staking in the provided liquidity pool, fees from every NFT purchase will be distributed across the entire ecosystem, artists using the platform will receive a 2% interest on every sale. Weekly and monthly events will be held to award our top liquidity providers and most NFT sales, during these events, 3 of our community members which will be randomly picked will be rewarded with a unique secret-rare artifact. This will be the beginning of the RBNB NFT museum.

As the BSC network keeps blooming, we hope to bring more utility for RBNB.

·\$· **ABOUT RBNB**

This project is made for the large expanse of the BSC network built on the Binance Smart Chain Network. RBNB's aim is to merge the DEFI and NFT marketplace. This will be ultimately achieved by the seamless integration of staking and lending protocols alongside art galleries. The birth of this project was due to the increased adoption of artifacts on the BSC network, this will help generate big financial growth opportunities for our beloved community. This project will heavily thrive given the launch of the Binance NFT marketplace which is beyond awesome.

·\$· **FARMS**

RBNB farming and Vaults is the method of staking or locking cryptocurrency in Decentralized finance to earn rewards. The theory of RBNB farming as an aggregate called liquidity mining which has been developed from the decentralized financial sector. Of which, is generally a personal staking can earn tokens in return for their participation in the DeFi application.

·\$· STAKES

tRBNB staking is the method of energetically contributing in the confirmation of transactions on the blockchain with a Proof of Stake (PoS) mechanism, anyone with the lowest balance expected to stake a particular cryptocurrency can also confirm transactions on the block chain and earn reward for this process.

The user assets reserved in a system that enables the staking operation for a specific duration of time and during the storage operation you can earn incomes for a specific duration of time. This process rewards users that have staked a quantity of assets in the network and play a role in the network strength. The locking of crypto assets or currency will provide to conforming all the hopes of the stakeholders in the network and keeps it growing.

RBNB cards will be issued on our smart contract as a utility to serve as a form of NFT, this will be given to initial investors who have participated in the PreSale via our contract address and buy with a minimum of 1 BNB through self-drop system.

·\$· GAMEWARS

Nowadays, the majority of games circulating are online games with a centralized network. This centralized network implies that all data both logins and passwords are stored on the server and regulated by the administrator of the game app. However, this is different from the Blockchain Game and Dapp concept, no data is stored or regulated by the administrator or game app owner. RBNB game wars enable you to play for fun and generate RBNB Tokens using a decentralized system that is transparent. RBNB in-app gaming allows user to interact and play with the digital collectibles they own, creating a further level of engagement. A range of single and multiplayer game experiences can be played within the Dapp using the Augmented Reality features. RBNB users gain access to game experiences based on the collectibles they own, for example, owning a digital collectible can grant access to play AR games, which can also be played multiplayer against other RBNB users who own digital collectibles. As users play through, they can earn RBNB Tokens and find ranges of common to secret-rare digital collectibles and virtual goods. We aim to produce game content as bite-sized playable adventures which are released on a regular basis, both as generic to RBNB and in partnership with licensors.

·\$· **BUY-BACK**

Bi-Weekly Buy-Back strategy is the method of establishing the price and percentage of RBNB Token in circulation. We will continue this strategy until we have bought back and burnt more than half of our initial supply. This gives rise to each asset and has the ability for financial development for investors.

·\$· AIRDROP AND BOUNTY PROGRAM

For Airdrop:

- Airdrop token allocation: 3% of the total supply
- Airdrop distributions Date: To be announced
- Airdrop reward: 10 RBNB token
- Referral reward: 10 RBNB token for each referral

For Bounty:

- Bounty token allocation: 2% of the total supply
- Youtube bounty: Create Videos and upload on Youtube channel minimum is 10k subscribers and 100 Likes with a reward of 1000 RBNB Token per video
- Telegram bounty: Post on Telegram channel minimum is 40k subscriber and 20k viewers with a reward of 1000 RBNB token per channel.
